Patient: _____ Date: _____

Species/Breed: _____ Age: _____

I understand that in performing the following procedure(s) my pet will receive a general anesthetic. I understand that some risk of injury or death always exists with anesthesia and/or surgery, and I am encouraged to discuss any concerns I have about those risks with my veterinarian before the procedure is initiated. We offer several options to minimize surgical complications and increase your pet's comfort, both during surgery and recovery.

ITEMS LISTED BELOW ARE OPTIONAL AND WILL BE ADDITIONAL COST.

YES NO Please INITIAL in either the YES or NO Column

_____ **PRE-ANESTHETIC BLOOD WORK (\$97):** Allows assessment of organ function and evaluation of underlying diseases such as: diabetes, infection, anemia, liver dysfunction, and kidney dysfunction that may increase your pet's anesthetic risks and complicate recovery.
RECOMMENDED FOR ALL PETS, REQUIRED FOR ALL PETS OVER SEVEN YEARS OLD.

_____ **LASER SURGERY (\$60):** Aids in decreasing bleeding at time of surgery, decreases healing time, decreases pain during recovery, decreases risk of infection following surgery.
INCLUDED IN ESTIMATE OF PRICING FOR DECLAW PROCEDURES.

_____ **ADDITIONAL POST-SURGERY PAIN COMFORT PACKAGE(\$30):** Beyond current oral pain meds that already go home - additional long-lasting pain management injection for comfort of pet on first night at home

_____ **THERAPY LASER (\$18):** Therapy laser is a painless procedure that helps stimulate tissue regeneration and promotes cell growth. This will result in decreased healing time, decreased pain during recovery, and decreased risk of infection following surgery.

_____ **MICROCHIP (\$72):** Includes the price of registering the chip with Home Again Microchipping. Provides peace of mind that if your pet is lost, they have a permanent, lifetime ID implanted in them. This uses a large needle, so we recommend doing it while under anesthesia.
